Profile Summary

I'm Amirhossein Alijani, a Python and Django developer focused on building custom, modular, and scalable systems.

With over 7 years of experience in programming — including 3 years of hands-on work in real-world projects — I specialize in developing advanced admin panels, tailored backend systems, and performance optimization.

Beyond coding, I care deeply about clean architecture, maintainability, and delivering solutions with a true sense of ownership.

I'm seeking opportunities to contribute to meaningful and technically challenging projects.
